Timberhouse Corner

The Hawk

By Matthew and Rebekah Lumkes

Hawk how graceful do you fly, round in circles in the sky.

Swooping, diving, and gracefully flying, round in circles in the sky.

Animal Corner

Independence Day Pets

On the fourth of July the Lumkes' went to a small fair in Brownsburg. While they were there they did a goldfish game. If you got the ping-pong balls into the glass cups you win a goldfish. Matthew and Rebekah each got a goldfish. Rebekah's is named Comet and Matthew's is named Silver. *Rebekah Lumkes*

Wildlife Corner

Facts on Red Tailed Hawks

Red tailed hawks are beautiful birds of prey and are very common in the USA. Here are some facts about them:

-  **Grow to be 25 inches long with a wingspan of 4 ft.**
-  **Weight is 4 lb. (Very heavy for a bird, they have hollow bones)**
-  **Eat rodents, skunks, bats, and muskrats.**

Pilot Corner

Boone town County Airport

In the end of June the Lumkes' went to Boone Town County Airport for the young eagles program. Rebekah flew in a Zenith Zodiac and Matthew flew in a RV, which is like a Zenith, but faster (that's why Matthew chose it). Later on when then another person was taking a ride in the RV the pilot went on rough ground and the front wheel folded under and the plane almost flipped. The people weren't hurt, but the plane's propeller and nose was damaged. *Lumkes Children*

RC Corner

Fix It Up

The Lumkes' have a broken RC glider that they are going to fix up so they can fly it.
